

The ROLF WEBER GROUP is switching to a new ERP system

Dear business partners,

the ROLF WEBER GROUP will be switching to a new ERP system on March 30, 2026. We would like to inform you, our business partners, about the potential impact of this change by April 7, 2026.

What remains?

- Your contacts within the company.
- Our contact addresses, telephone numbers, email addresses, and bank details.
- Unless you have received other information, the current contracts, terms and conditions, and billing procedures remain unchanged.

What is changing?

- Your customer number will change to a 7-digit format.
- The current item numbers will be replaced with a new 7-digit item number.
- The layouts of order confirmations, delivery notes, invoices, etc., will be updated.

Implementing a new ERP system presents a significant challenge, and despite all planning and testing, delays in processing business transactions may occur. Naturally, we will strive to make the transition to the new ERP system as seamless as possible for you. During this technical transition, our operations will be down during the period

from March 30, 2026 to April 7, 2026

Deliveries are only possible to a very limited extent. Please adjust your stock levels accordingly.

For further questions, please contact your usual contact person. They will be happy to assist you.

We thank you for your understanding and look forward to continued good cooperation.

Best regards

ROLF WEBER GRUPPE
